CODING/MARKING

HSAUSA LLC. is a United States and Latin American distributor for package coding, industrial marking, form printing, mail printing, page printing, lumber printing, as well as custom designs for integrators. HSAUSA provides high-resolution, high-quality printing with a complete integrated software package included. System features include several different bar codes, counters, time and date, shift codes, database connectivity, and network solutions.

HSAUSA presents ink-jet "drop-on-demand" industrial marking and coding product with "state of the art" electronics, clear high performance digital ink-jet printing. Our printers operate with a complete integrated Windows software package included at no charge. HSAUSA supplies ink-jet equipment for OEM applications as well as complete and customized printing solutions.

Advanced Technology

Manufactured by HSAutomatic, ApS, a leading manufacturer of product identification equipment worldwide. High-resolution piezo ink-jet technology from Xaar, and thermal ink-jet technology from HP.

These ink-jet printheads are capable of handling a wide variety of ink types, including oil-based, solvent, water, and UV curable inks. In addition, it can be used to print onto almost any surface such as porous and non-porous material, and the print resolution is extremely good quality.

Worldwide Dealer Network

HSAUSA has a trained and certified distribution network throughout the United States and Latin America.
